

AIPHONE

GT SYSTEM

Video Multi-Tenant System

GT system is ideal for large scale residential Style mixed with IP technology. Enable

5,000

**Aiphone's multi-tenant system
can now serve up to 5,000 residences.**

► P08

- Install one system for housing complexes with multiple buildings.
- Cover a building with more than 500 units with one system.

7-inch

Designed to be even easier to use.

► P05

- Tenant station features a clear 7-inch display.
- Compact and intuitive functional design.

**IP and NFC technologies enable
effective management.**

► P09

- Building management from anywhere via IP network connection.
- Built-in NFC reader for easy programming and tenant management.

GT-1C7

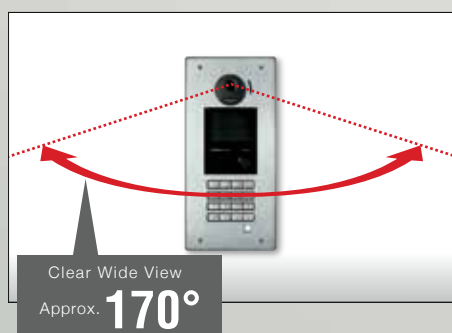

Tenant Station

7-inch display (GT-1C7)

- High-resolution, 7-inch display makes visitors easy to recognize.
- Functional design, intuitive control: illuminated easy-to-see buttons for door release and communication during calls from entrances.

Wide / Zoom & PanTilt

- Panoramic Wide Angle View
- To provide effective security, GT System features a wide angle camera that enables you to see a clear panoramic view. Easily see and identify visitors standing on the sides and people of all heights.

Wide Image

Zoom Image

PanTilt Image (GT-1C7, GT-2C only)

Door release

- Confirm the visitor and surroundings then open the entrance from inside.

Selection of tenant stations for all needs

GT-1C7
Color display tenant station
• 7-inch display
• Hands-free

GT-1M3
Color display tenant station
• 3.5-inch display
• Hands-free

GT-2C
Color display tenant station
• 3.5-inch display
• Picture memory
• Optional individual door station
• Optional handset (GT-HS)

GT-1A
Audio tenant station
• Hands-free

GT-1D
Audio tenant station
• Handset

Entrance Station

All-in-one type / Module type

Module type

All-in-one type GT-DMB-N

Panoramic view angle & clear color image

- 170° angle wide view camera.
- White light LED illuminates automatically in low-light conditions.

Optional security camera for more security

- Connect an additional CCTV camera. You can select one of the cameras placed at the entrance for monitoring. This allows you to confirm visitors from various angles, thus enabling the prevention of intrusion by suspicious individuals.

NFC Reader

- Use the NFC reader or access codes for lock control.
- The NFC reader can also be used for programming the system. (→P.09)

2 panel styles

- 2 styles to choose from: All-in-one type or Module type.
- Module type allows audio only and other configurations.

All-in-one type

Module type

Concierge Station

3.5-inch display

- Easy operation for all concierge functions.
- Video monitoring of entrance stations.

Wide / Zoom & PanTilt

- See the 170° wide view video from the entrance stations.
- Use zoom and pantilt functions for a detailed view.

Reception mode function

- Using this function, all entrance station calls are automatically transferred to the concierge station, giving the concierge the ability to screen visitors.

Can connect an individual video door station (JO-DV)

- Automatic LED illuminator for low light conditions.

JO-DV

System Variation

Single building system

- Ideal for small- and medium-size residential buildings.
- Audio only configuration also possible.

Maximum Capacity

	Tenant building / section	
	Standard system	Expanded system
Entrance station	5	16
Concierge station	2	4
Tenant station	48 ^{*1}	500

*1: Up to 100 GT-1D audio tenant stations can be connected when configuring a standard audio only system.

5,000

Multi building system

- Install one system for housing complexes with multiple buildings.
- Cover a building with more than 500 units with one system.
- Building management from anywhere via IP network connection.
- Audio only configuration for tenant buildings also possible.

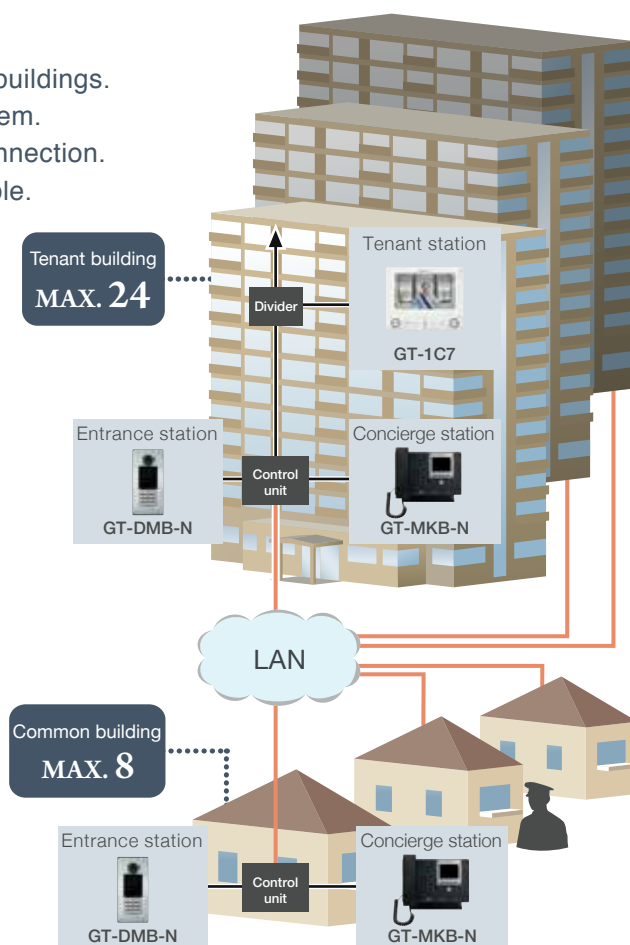

Maximum Capacity (Number of stations are per building / section)

	Tenant building / section		Common building / section	
	Standard system	Expanded system	Standard system	Expanded system
Entrance station	4	15	4	15
Concierge station	1	3	1	3
Tenant station	48	500	—	—

Total maximum capacity

(Total for tenant building / section and common building / section)

Entrance station	480
Concierge station	96
Tenant station	5,000

IP technology

- Multiple tenant buildings and main buildings can be connected via an IP network to create a multi building system for centralized management.
- A maximum of 24 tenant buildings and 8 main buildings can be connected.
- Multiple tenant buildings can be combined to accommodate large-scale residential buildings with more than 500 units.
- Connects buildings together and enables communication.

System programming and NFC technology

Easy system setting on a PC or Android mobile device

- Settings can be made from a PC or Android mobile device by using GT Setup Tool.
- Supported OS: Windows 7, 8.1, 10.*1
- Supported Android OS version: Android 5.0 and greater.

*1: For operating systems not listed, please contact your Aiphone dealer.

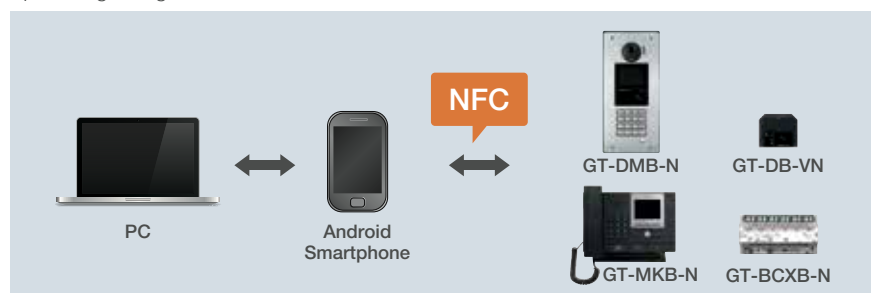

GT Setup Tool for Windows

GT Setup Tool for Android

Uploading the setting data

Uploading using an Android mobile device for GT-DMB-N, GT-DB-VN, GT-MKB-N, GT-BCXB-N (W/NFC reader)

Connecting a unit to a PC via USB

Uploading using a network connection

Multi Building Development

Installation example

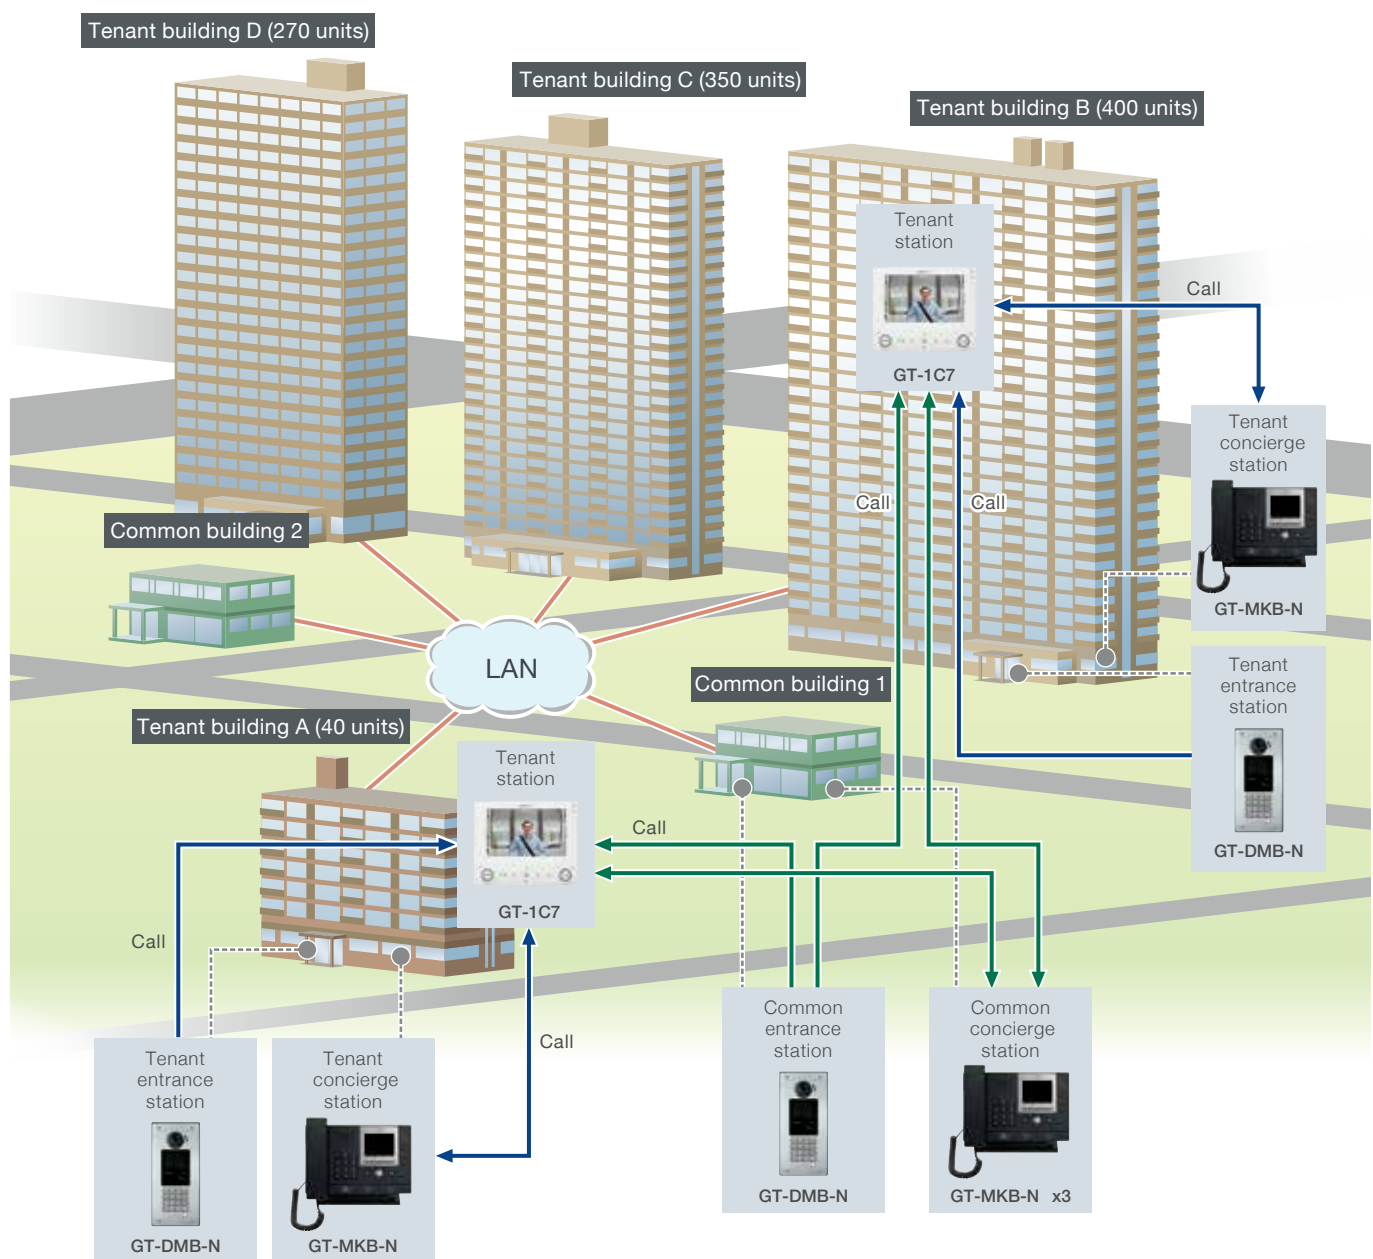

e.g. 4 Tenant buildings (4 Entrance stations, 4 Concierge stations, 1,060 Tenant stations)
2 Common buildings (2 Entrance stations, 6 Concierge stations)

- Can be configured as a single system without creating separate systems for each building.
- Connect buildings through an IP network. Ideal for large sites with long distances between buildings.
- The common building can communicate with all tenant buildings.

Proposed system:

- 1 Standard system, 3 Expanded systems in tenant buildings.
- 2 Expanded systems in common buildings. (Maximum capacity → P.08)

*Possible to mix video and audio only systems.

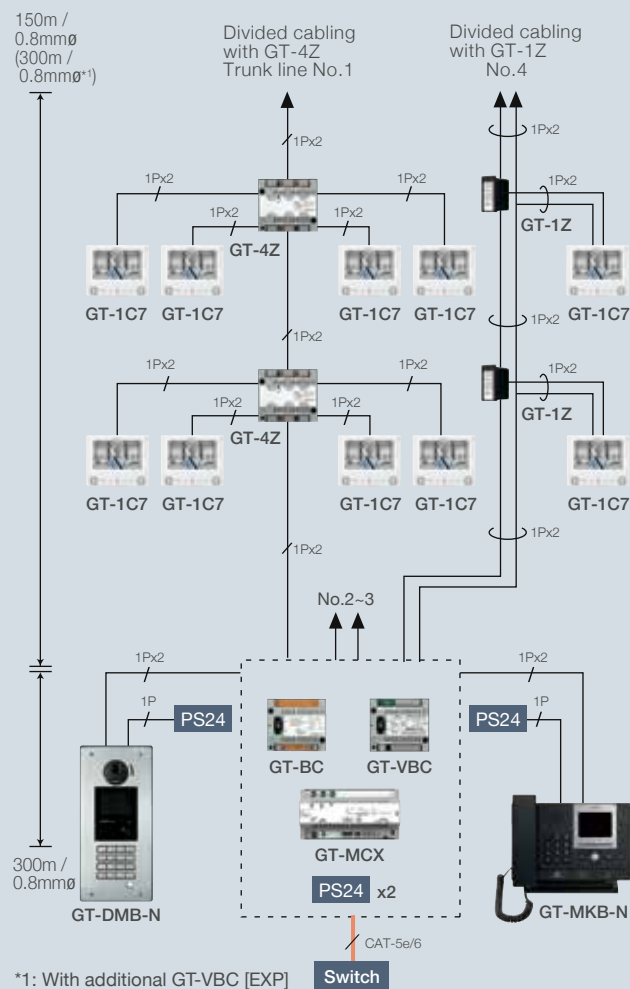

Tenant building A, B, C, D: In the above example, tenant buildings mean residential buildings and towers.
Common building 1 & 2: In the above example, common buildings mean buildings such as security centers and administrative offices.

System configuration example

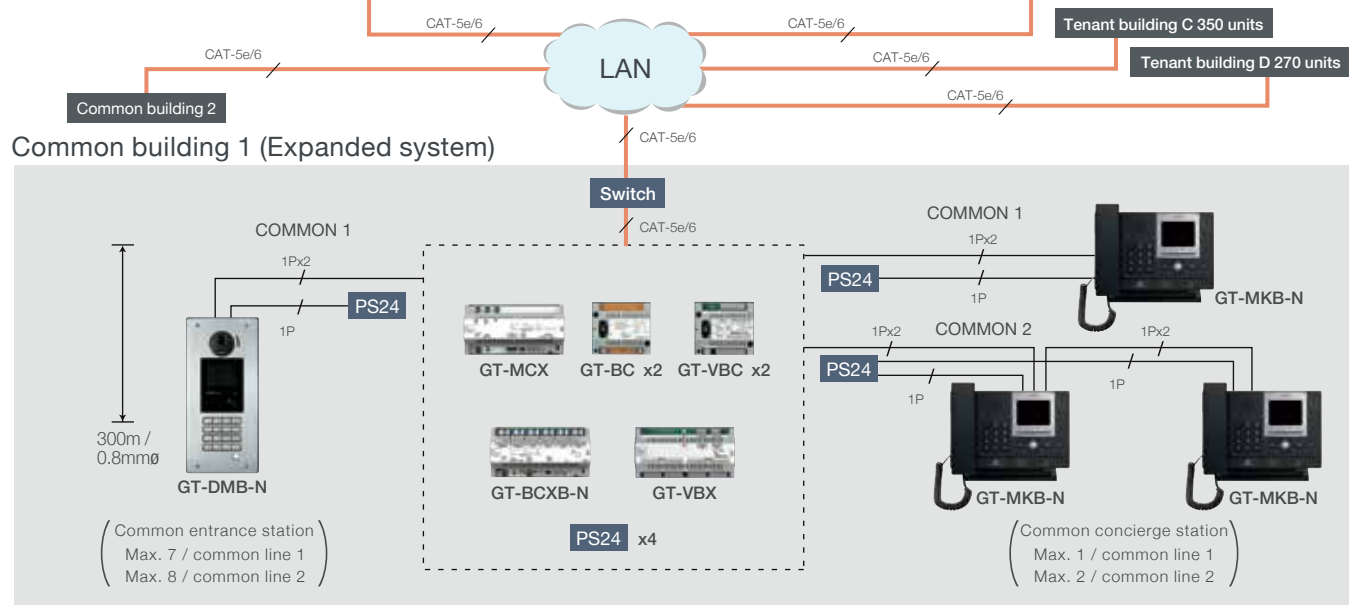

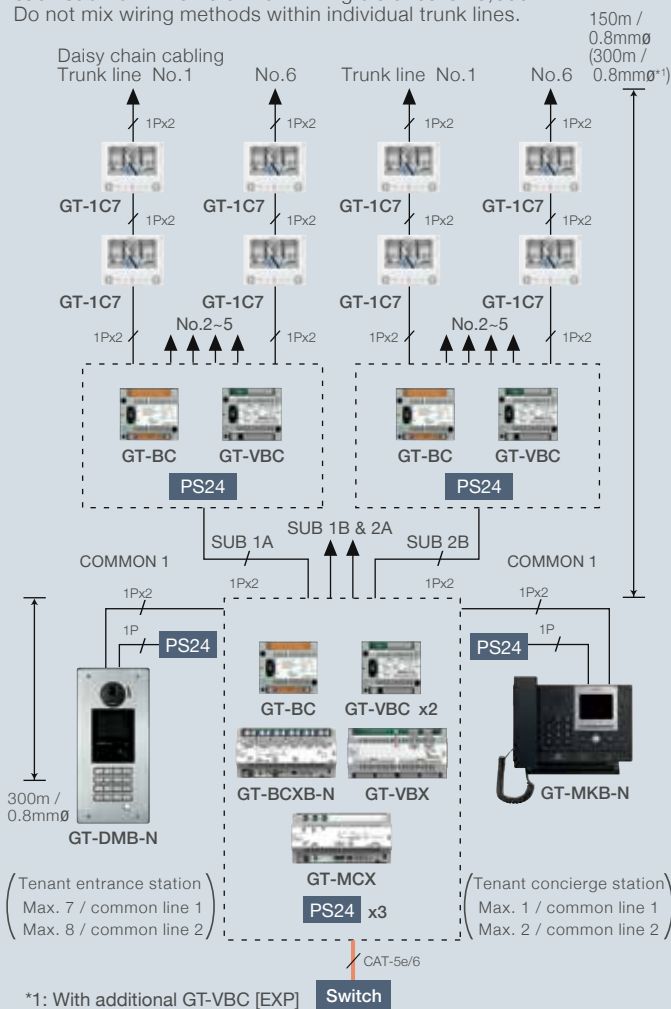

Tenant building A: 40 units (Standard system)

Total max. wiring distance is 2,500m.
Do not mix wiring methods within individual trunk lines.

Tenant building B: 400 units (Expanded system)

4 sub trunk lines (SUB1A, 1B, 2A, 2B)
Max. 125 Tenant stations and max. 2,500m wiring distance for each sub trunk line. Total max. wiring distance is 10,000m.
Do not mix wiring methods within individual trunk lines.

*Cable: 1Px2, 2-conductor cable solid copper & non-braided, polyethylene insulation.

Large Scale Residential Building (more than 500 units)

Installation example

e.g. 3 Tenant sections (1,100 Tenant stations)

1 Common section (3 Entrance stations, 3 Concierge stations)

- Multi-building control units allow systems to be configured without having to use separate systems for each section.
- All tenant stations can be called from any entrance station or concierge station.

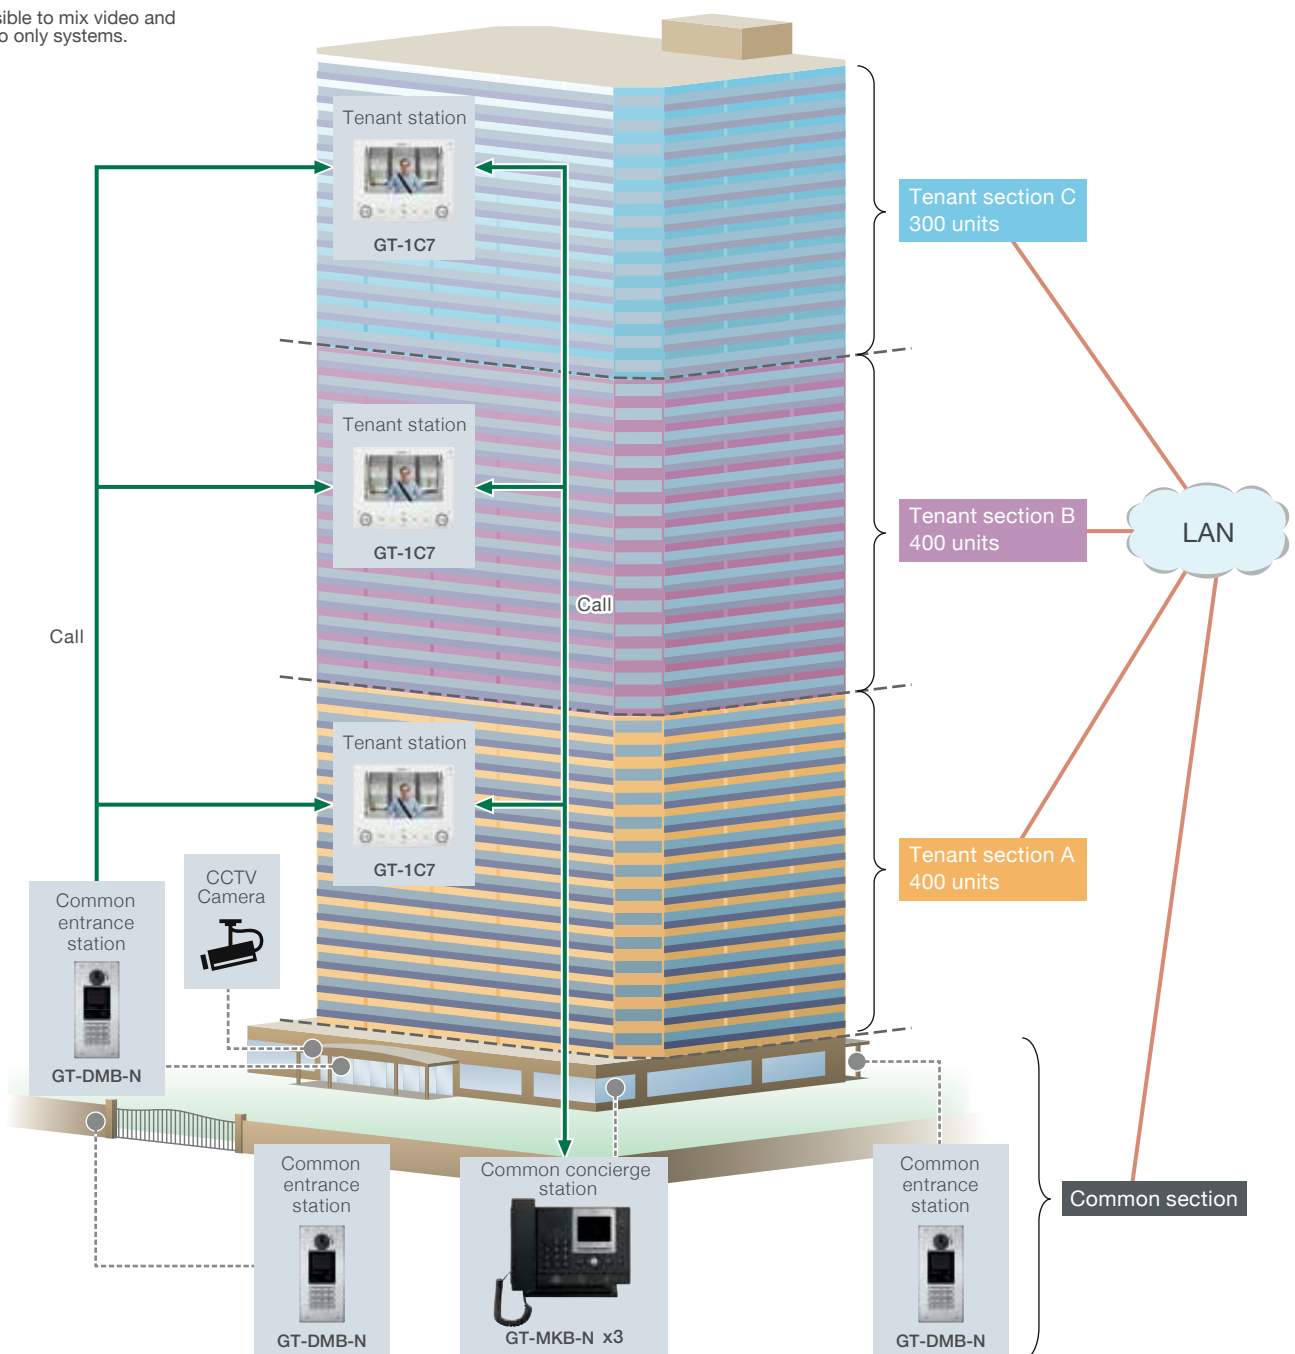

Proposed system:

3 Expanded systems in tenant sections

1 Expanded system in common section

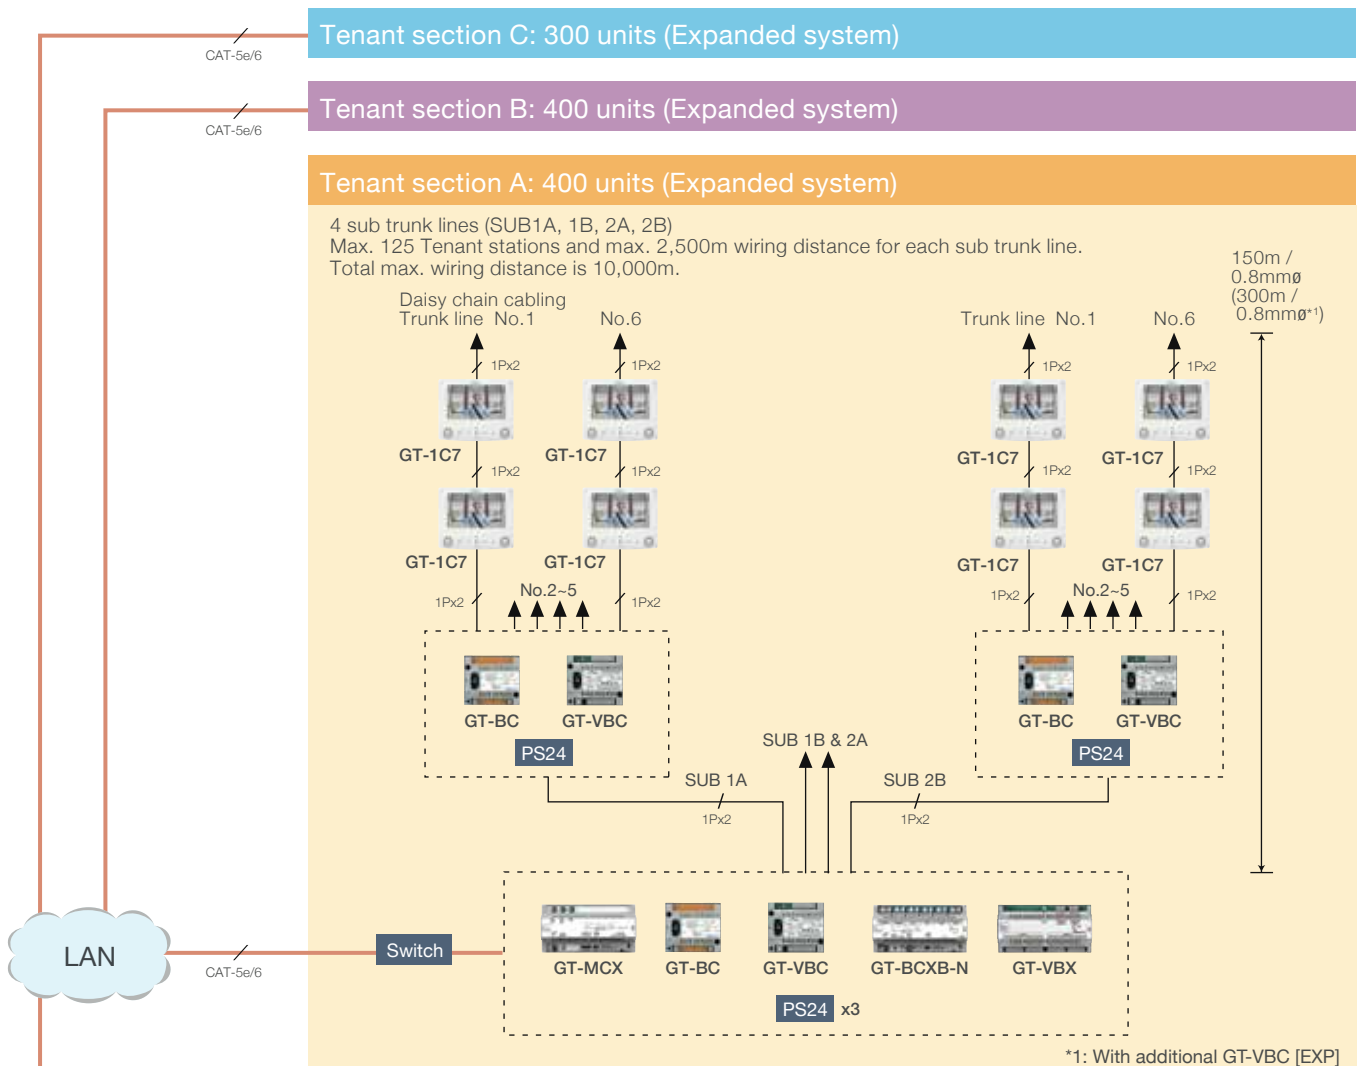

(Maximum capacity → P.08)

*Possible to mix video and audio only systems.

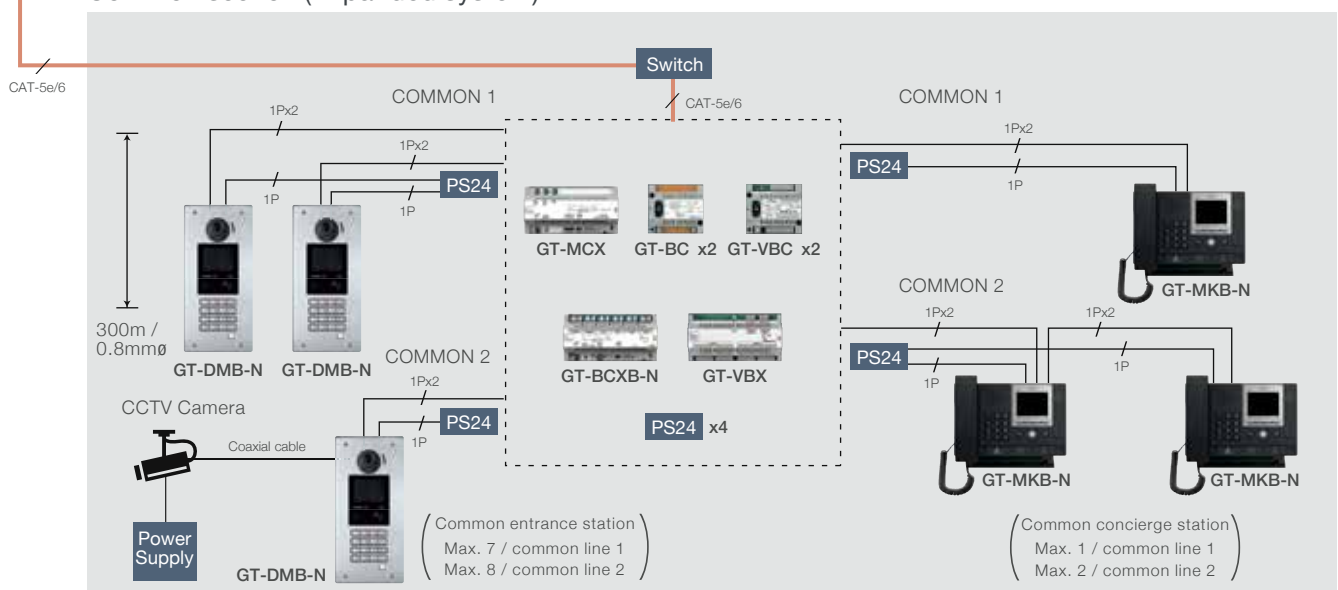

Common section: In the above example, common section means lobby and common entrance.

System configuration example

Common section (Expanded system)

*Cable: 1Px2, 2-conductor cable solid copper & non-braided, polyethylene insulation.

Installation example

e.g. 2 Tenant sections (60 Tenant stations)

1 Tenant building (1 Entrance station, 1 Concierge station, 400 Tenant stations)

1 Common section (1 Concierge station)

- All sections (buildings) can be configured in a single system without creating separate systems for different types of buildings.
- Connect sections through an IP network. Ideal for large sites with long distances between sections.
- The common section can communicate with all tenant sections.

Proposed system:

2 Standard systems in tenant sections.

1 Expanded system in tenant building.

1 Standard system in common section. (Maximum capacity → P.08)

*Possible to mix video and audio only systems.

Tenant section A, C: In the above example, tenant sections mean individual housing sections.

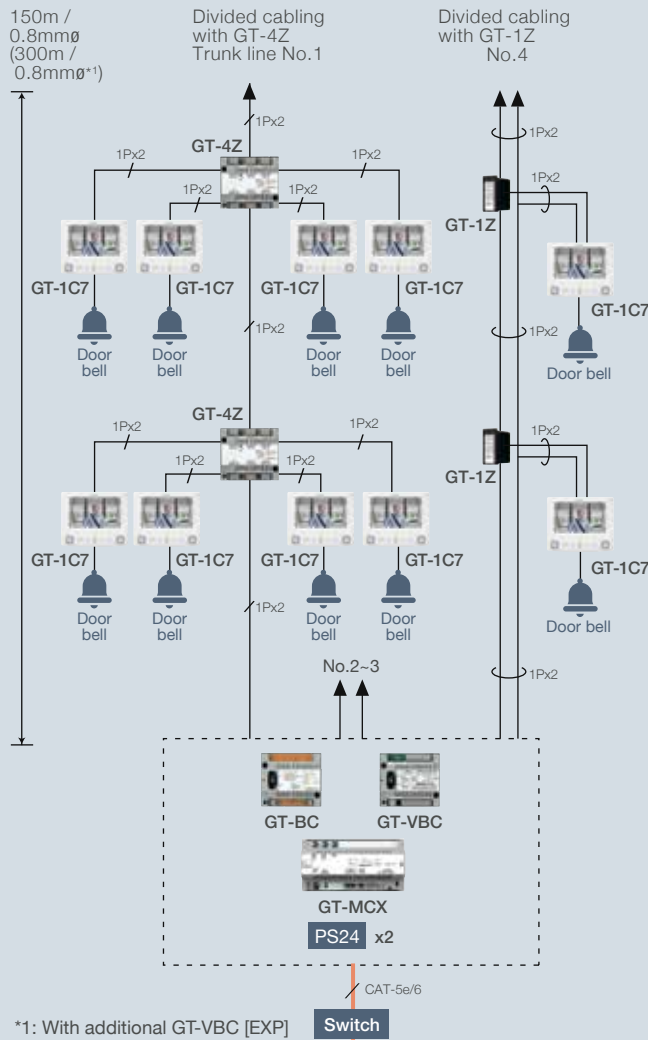

Tenant building B: In the above example, tenant building means residential tower.

Common section 1: In the above example, common section means buildings such as security centers and administrative offices.

System configuration example

Tenant section A & C: 30 units (Standard system)

Total max. wiring distance is 2,500m.
Do not mix wiring methods within individual trunk lines.

Tenant building B: 400 units (Expanded system)

4 sub trunk lines (SUB1A, 1B, 2A, 2B)
Max. 125 Tenant stations and max. 2,500m wiring distance for each sub trunk line. Total max. wiring distance is 10,000m.
Do not mix wiring methods within individual trunk lines.

Common section (Standard system)

*Cable: 1Px2, 2-conductor cable solid copper & non-braided, polyethylene insulation.

Small Residential Building (e.g. 20 units)

Installation example

e.g. 1 Tenant building (1 Entrance station, 1 Concierge station, 20 Tenant stations)

Proposed system:

1 Standard system in tenant building.

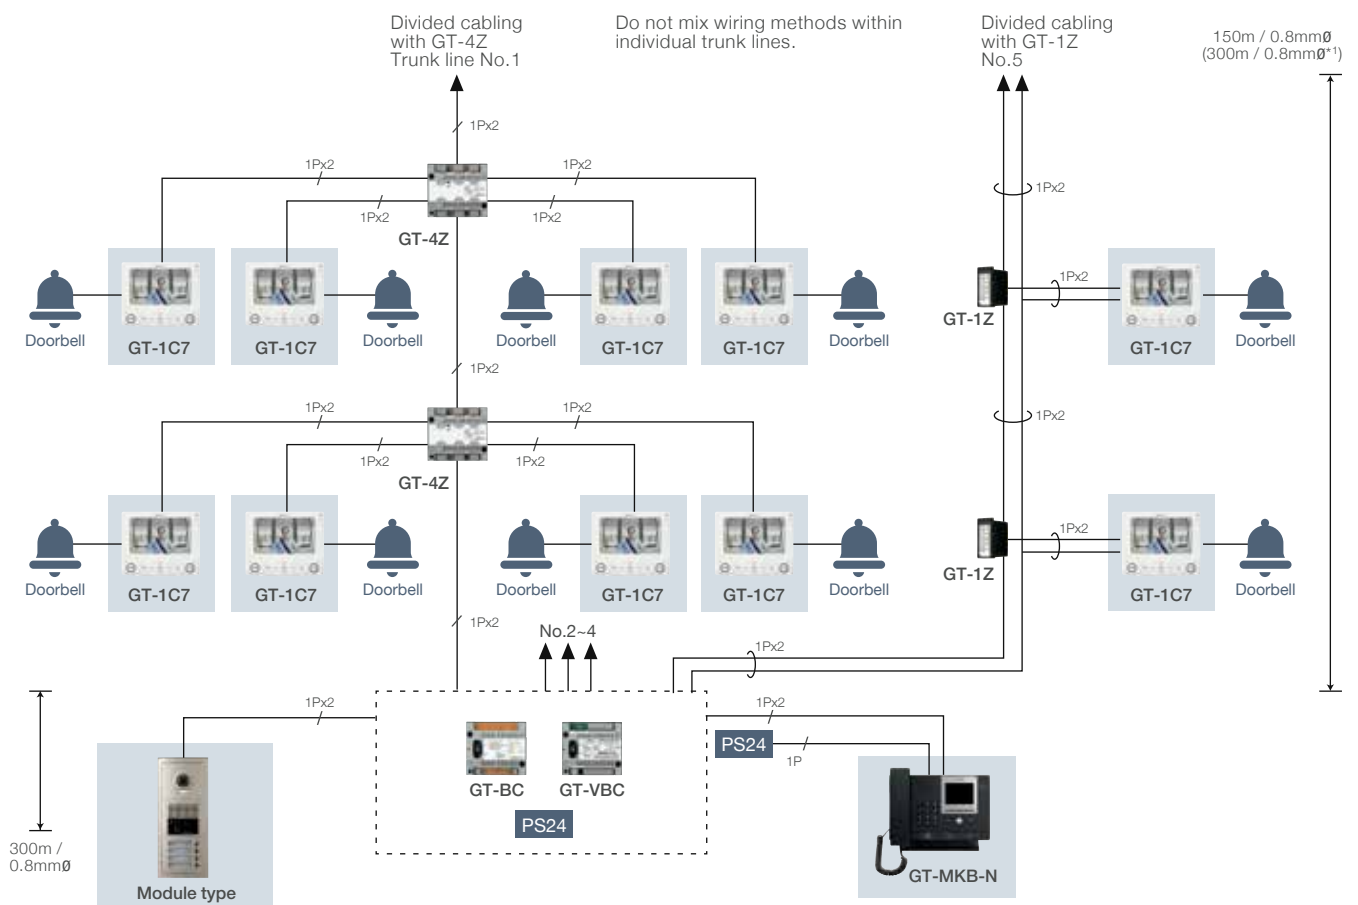

(Maximum capacity → P.08)

*Possible to mix video and audio only tenant stations.

System configuration example

Total max. wiring distance is 2,500m.

*Cable: 1Px2, 2-conductor cable solid copper & non-braided, polyethylene insulation.

*1: With additional GT-VBC [EXP]

Medium-Size Residential Building (e.g. 150 units)

Installation example

e.g. 1 Tenant building (2 Entrance stations, 2 Concierge stations, 150 Tenant stations)

Proposed system:

1 Expanded system in tenant building.

(Maximum capacity → P.08)

*Possible to mix video and audio only tenant stations.

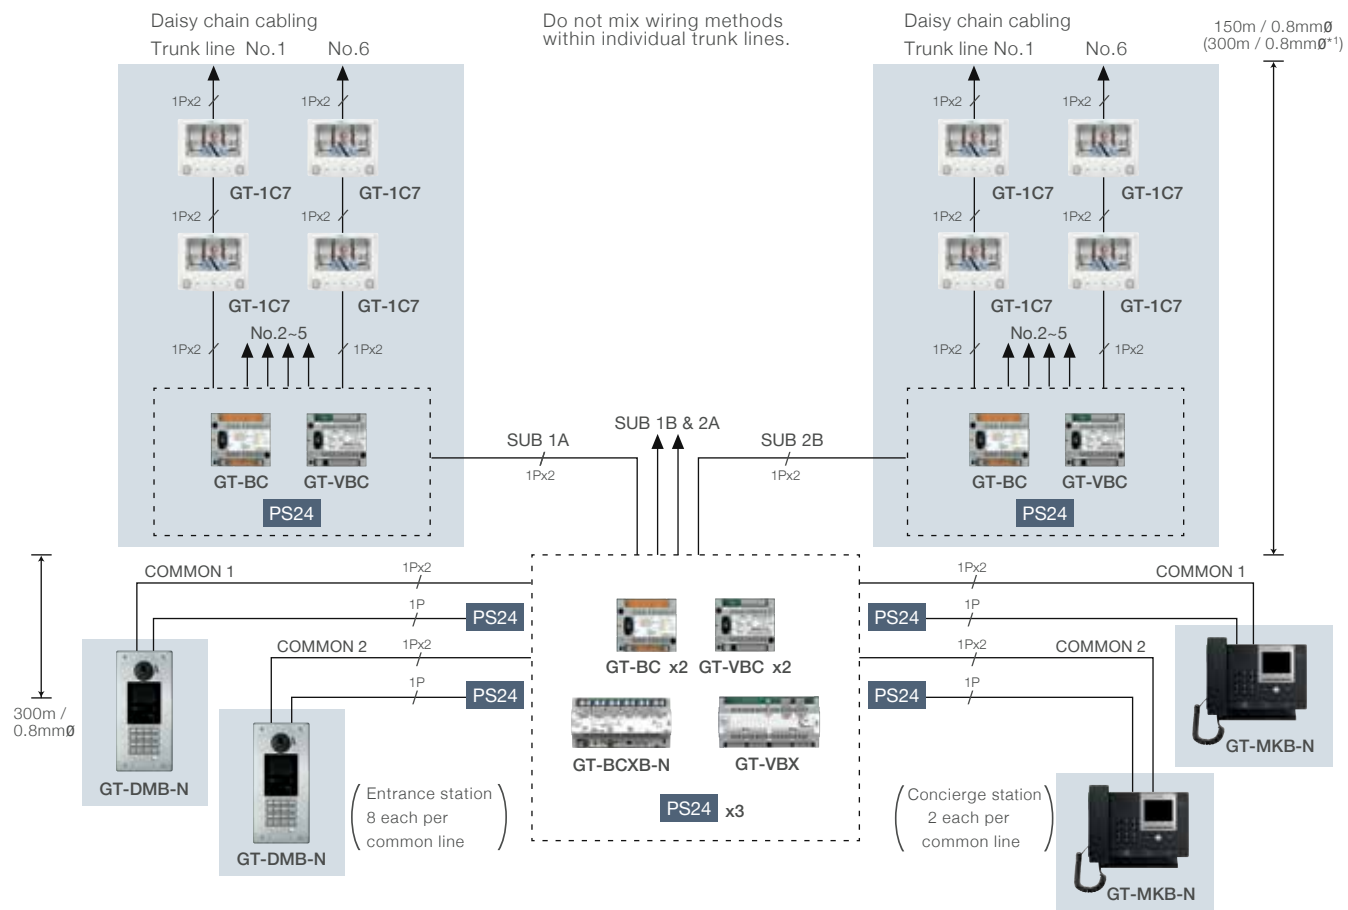

System configuration example

4 sub trunk lines (SUB1A, 1B, 2A, 2B)

Max. 125 tenant stations and max. 2,500m wiring distance for each sub trunk line.

Total max. wiring distance is 10,000m.

*Cable: 1Px2, 2-conductor cable solid copper & non-braided, polyethylene insulation.

*1: With additional GT-VBC [EXP]

Entrance station

All-in-one type

GT-DMB-N
Entrance station
W/NFC reader
(Back box not included.)
Use GF-3B.

- 170° angle wide view camera.
- Audio & visual guidance to provide visitors status and operation assistance.
- Search names and numbers using the keypad.
- Custom programmable welcome messages can be displayed.
- 9 languages (English, French, German, Spanish, Dutch, Italian, Norwegian, Turkish and Finnish) are available for messages on Guidance display.
- 6 languages (English, French, German, Spanish, Dutch and Norwegian) are available for audio guidance.
- White light LED illuminates automatically in low-light conditions.
