ICP-CP4TS 4.3"
## For Solution Ultima Series Control Panels

www.boschsecurity.com.au

BOSCH
Invented for life

The ICP-CP4TS 4.3" Touchscreen is an entry level codepad for the Solution Ultima 844/880 intrusion panel. Designed to mimic the functionality of the ICP-CP508W Icon keypad while also providing the flexibility and ergonomics of a modern touchscreen, the ICP-CP4TS allows for both convenient use and full programming of the intrusion panel. The simplistic user interface is both easy to navigate for the end user, and familiar to operate for the installer.

Icons Overview
Touching icons will provide the user with additional information or functions.
NOTE: The Icons displayed will depend on your alarm system configuration.
