INSTALLATION

The KVM cable should be connected to the PC port of the KVM switch, while a set comprising a keyboard, mouse, and monitor should be connected to the control port of the KVM switch. Once all hosts have fully booted up, the KVM switch will be ready for use.

USAGE INSTRUCTIONS

Boot mode

When connecting multiple PCs, you can power on the specific PC you wish to operate simultaneously with the others, ensuring all PCs are powered up together. Note that you should avoid switching between PC ports until each PC has completed the boot process.

Switching mode

Once you have finished step 1, you can use the button on the KVM panel to switch between ports. For instance, if you need to control the PC connected to the second port, simply press the corresponding button. When the indicator for PC2 is illuminated, you can then operate that PC. (the button. When the indicator of PC2 is on, you can operate the PC.)
