Speaker Cable 2 Pair Insulated

Product Description

The GLOBAL 2C15100 speaker cable is designed and suitable for low impedance & 100v line audio installations where a double insulated cable is required.

The cable is count down metre marked, making it easy for the installer to identify the remaining cable length and is batch numbered for quality control. A pull box with protective reel and stand makes the delivery of the cable easy and effective.

Features

- Pull Box with protective reel
- Count down metre marking
- Batch numbered
- Reinforced handles
- Rip Cord
