

HPDUCT® Electrical PVC Ducting — Grey

UPVC

SKU: HPPD

Durable & Compliant Electrical Ducting — Made in Australia

HPDUCT® Electrical Ducting is proudly manufactured in Melbourne, Australia, to meet the highest industry standards. Engineered from rigid UPVC, this premium ducting provides a secure and effective solution for cable management in electrical installations. Its durable construction ensures long-lasting performance while offering easy installation and a professional finish.

Key Features:

- ✓ **High-Quality UPVC Construction** — Manufactured from rigid UPVC for superior durability and impact resistance.
- ✓ **Flame Retardant & Safe** — Self-extinguishing with a **V0 rating (UL94)** for enhanced fire safety.
- ✓ **IP40 System Protection** — Designed to safeguard electrical cables from dust and accidental contact.
- ✓ **Compliant with AS/NZS 4296:1995** — Meets Australian and New Zealand standards for electrical ducting.
- ✓ **Pre-Punched Holes** — Available on select sizes for faster, hassle-free installation.
- ✓ **Extreme UV Stabilised** — Built to withstand harsh Australian conditions, suitable for indoor and outdoor use.
- ✓ **B.E.P Certified** — Assured compliance with Building and Electrical Product (BEP) certifications.
- ✓ **Lead-Free & Safe** — Designed with environmental and user safety in mind.
- ✓ **Flexible Sizing Options** — Available in sizes ranging from **16mm to 150mm**, supplied in **4-meter lengths** (2-meter lengths available upon request).

Ideal Applications:

- General electrical installations
- Industrial and commercial cable management
- Above-ground installations where a discreet grey finish is preferred

The **grey** color offers a subtle, professional appearance, making it a preferred choice for many electrical projects. For more details or to place an order, contact **HP Profiles** today!
