

AIRKEY® MAXIMUM SECURITY REMOTE CONTROL

Airkey Programmer – unlocking more flexibility

Neatrol Systems

www.neatrol.com.au

The AKPROG Airkey programmer brings added flexibility to the Airkey learning remote receivers. Allowing easy deletion of individual Airkeys and the simple backup and restoring of all the information on any standalone Airkey receiver, the Airkey programmer adds further flexibility to the Airkey suite of products.

Features:

- Plugs directly into all AKRX21-P, AKRX21S and AKRX22S series Airkey receivers and AKPROX proximity readers.
- Simple delete function allows any one (or more) Airkey transmitters to be easily deleted without affecting other stored Airkeys.
- Easy to completely backup and restore the entire contents of any Airkey receiver/reader within seconds.
- Dual mode serial number display shows either standard hexadecimal Airkey serial numbers or Airkey Wiegand decimal card numbers.
- Removable storage chips enable backups of any number of Airkey receivers/readers to be easily stored and managed.
- Airkey programmer derives operating power from the target receiver/reader eliminating the need for internal batteries.
- No price penalty for far superior technology.

Applications:

- Garage doors, automatic gates.
- Remote arming and disarming of security alarms.
