

remote access receivers

AKRX64-Wnn

All Airkey receivers are based around a microcontroller with non-volatile storage and a high sensitivity PLL locked receiver module.

- Standard Wiegand data pair outputs for access control applications
- 6 button input (select either buttons 1,2,3,4 or 3,4,5,6)
- 4 x Wiegand data output pairs
- 4 x rotary switches to select facility code that will be accepted
- IP65 sealed weatherproof enclosure with S/S ¼ wave antenna
- Dimensions: 115 x 90 x 55 mm (case only), 560g (incl antenna)
- 433.92MHz ASK receiver, -114dBm sensitivity
- 10-pin screw terminal connections
- Nominal 12VDC supply, ~40mA
- 128Kbyte non-volatile storage will synchronise 65536 serial numbers
- Operate with 2,4&6 button Wiegand Airkeys
- nn: Can be supplied with various Wiegand formats 26(STD), 27, 30, 32, 34, 35, 37 & 38-bit
- /MF option available for sites where several facility codes are present
