50m + Range

# Automatic Hands Free Access Control & Vehicle Identification

The Automatic Vehicle Identification long range reader is designed to provide fast and secure gate access for car parks, gated communities, commercial facilities, airports, hospitals, universities or anywhere secured access is needed.

The Protrac iD VID system is fully weatherproof and directly connects to access control systems, stands alone or network connected.
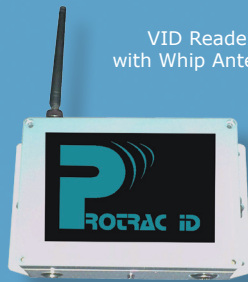

Benefits of the Protrac iD VID System:

- Up to 50m range as standard (options available to extend range)
- Range adjustable to suit any size entry or exit
- Protrac iD tag operates in any orientation and weather conditions
- Different tags for different applications
- Long battery life 7-10 years with M series and 3-5 years with standard series
- Tags have unique dealer/customer code and wiegand tag number is programmable by dealer (optional tag programmer for authorised dealer/distributor)
- Automatic driver ID
- Positively match tag to vehicle with unique tamper feature
- 2 models: 360 degree read direction with whip antenna or directional with patch type antenna
- Timed Relays to initiate gate opening sequence
- Connection to PC for programming
