

## 2T9000 PERSONNEL TAG

### Product Information Sheet

The Protrac iD 2T9000 Series tags are Ultra Long Range RFID tracking tags for personnel attached using standard ID card straps or lanyards. Tags have a standard ID card footprint (CR80) for attaching a photo ID.

All models are available with in built MIFARE, HID prox or HID i-class electronics making the 2T9000 a personal photo ID and access control, tracking credential, all on the one "credit card" sized tag.

### Features

- Tags constantly transmit a "heart beat" radio frequency pulse between 0.3 seconds and 40 seconds except USA which is 12-40 seconds.
- Long life battery technology - 5 years for a tag with a 1.5 second "heart beat" rate depending on switch usage.
- High impact resistant UV stabilised PVC case ultrasonically welded and sealed.
- 1 cm to 50 metre range.
- Each tag and heart beat pulse is uniquely identified and numbered.
- Optional 26 bit Wiegand coding for access control systems.
- Optional in built HID or MIFARE electronics enables tags to be read by HID Prox, i-class and MIFARE access control readers in addition to Protrac RFID receivers.
