Description

4Cabling 45RU 800mm Wide x 1000mm Deep Server Rack with Bi-Fold Mesh Door

4Cabling's Free Standing Server Racks have been designed as a cost-effective data management solution for installers and customers who require quick installation and great value for money.

Our server racks are designed to be easily set up and are made of high-quality solid cold-rolled steel with welded construction for

added strength and come in many sizes including as Wall Mount, Half Height and Freestanding Full Height Server Rack sizes.

The high-quality freestanding server rack is supplied fully assembled with solid top and base, plus removable side panels, Bi-fold Mesh door front and rear all lockable for added security. The new Bi-Fold door design is created to get maximum flexibility with minimum footprint without sacrificing security.

This data/ network cabinet provides flexibility for customers who know exactly what they require of their server rack. Possible usage applications include housing server room, DVR, security equipment, routers, patch panels, switches and rackmount equipment, Telephone Systems and PABX equipment, Network and Communications Equipment; UPS Equipment; Professional Audio Equipment; and other 19" Rack Mountable Equipment Applications.

Cable access is achievable via the roof or base by removable gland plates. 4Cabling server racks are built around universal 19" standards, to deliver compatibility with both leading vendor equipment manufacturers as well as OEM brands.

A wide range of 19" [server rack accessories](#) are available from 4Cabling to complement this cabinet as well as the rest of our range of quality server racks.
