AC1200 Smart Dual Band WiFi Router

### AC6

#### AC1200 Smart Dual-band WiFi Router

#### Product Overview

With Gigabit speeds complaint with IEEE802.11ac, the TENDA AC6 smart dual-band WiFi router offers throughput as high as 1167Mbps.

Powered with the latest features including beamforming+ technology and the innovative MU-MIMO, that's just the start. With the 28nm CPU, independent power amplifiers, four 5dBi high-gain antennas, you are assured to have an uninterrupted gaming experience and 4K video streaming.

Tenda's AC6 has great eco credentials too. With a power saving function, App-based management and migration of PPPoE user credentials allows for a smarter and eco-friendly digital life.

#### Features

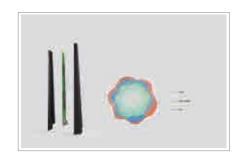

- 11ac speed up to 1167Mbps (5GHz: 867Mbps + 2.4GHz: 300Mbps)
- Realtek chipset for stable and fast WiFi connection
- High powered amplifiers and external antennas for whole-home coverage
- Beamforming+ for longer range of IEEE802.11ac-compliant WiFi clients
- Innovative MU-MIMO technology for more connected clients
- Smart WiFi Schedule for lower power consumption
- Migration PPPoE user name and password for hassle-free configuration

### Features

## 5th Generation WiFi: 802.11ac with Dual-band Connectivity

Compliant with IEEE802.11ac, AC6 offers a data rate as high as of 1167Mbps (5GHz: 867Mbps + 2.4GHz: 300Mbps), triple times faster than 11n-compliant routers. Its fast and stable performance makes it the ideal choice for lag-free HD streaming, online gaming and other bandwidth-intensive tasks.

## Four 5dBi high-gain antennas for whole-home WiFi coverage

With four 5dBi high-gain antennas that powered by the multi-oscillator radiation technology, AC6 blankets you home with reliable WiFi.

#### High-powered amplifiers

With the high-powered amplifiers for WiFi on both 2.4GHz and 5GHz bands, Tenda's AC6 delivers a stronger signal through walls, allowing you to enjoy uninterrupted connection in every corner of your home.

#### 28nm CPU for stability

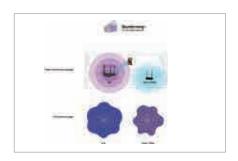

With 28nm CPU, AC6 allows you to enjoy a fast and stable connection throughout your home.

### **Features**

#### Innovative MU-MIMO technology

The innovative MU-MIMO technology delivered in AC6 allows communication with more wireless devices simultaneously and offers you the fastest possible connection.

## Beamforming+ for wider WiFi coverage and internet stability

Beamforming+ technology enables AC6 to lock on to your WiFi receiving clients rather than blast WiFi in all directions, and mitigates co-channel interference, letting you enjoy fast internet connection.

#### Hassle-free configuration

What if you forget your PPPoE user name or password when replacing your older router? Are you still troubled by complicated setup and configurations?

AC6 allows you to replicate the user name and password provided by your ISP by connecting the WAN port of your old router to the LAN port of AC6, letting you go from laborious configurations.

## Specification
