Refined viewing

Experience HD ready picture quality, whatever you're watching. Sony's unique X-Reality™ PRO processing engine analyses, cleans and refines images for beautifully detailed viewing. Even content streamed in low resolution is enhanced with X-Reality PRO to give a picture by Sony that brings everything you watch to life.

X-Reality PRO picture processing upscales every pixel for exceptional picture clarity. As frames are analysed, each scene is matched with our special image database to refine images and reduce noise - for a picture with incredible realism.
